Authorized Distributor of 80/20

Prepped and Ready to Assemble Guarding

Build out a guarding structure fast and effectively with preconfigured sections of mesh and posts. Add sections as needed or quickly take away portions that are no longer needed. 80/20 offers the best of both worlds with a quick solution combined with the customization of 80/20 products.

Framed Wire Mesh

Designed with a rigid steel frame, 80/20 guarding is equipped with mounting holes and a smooth and clean exterior finish.

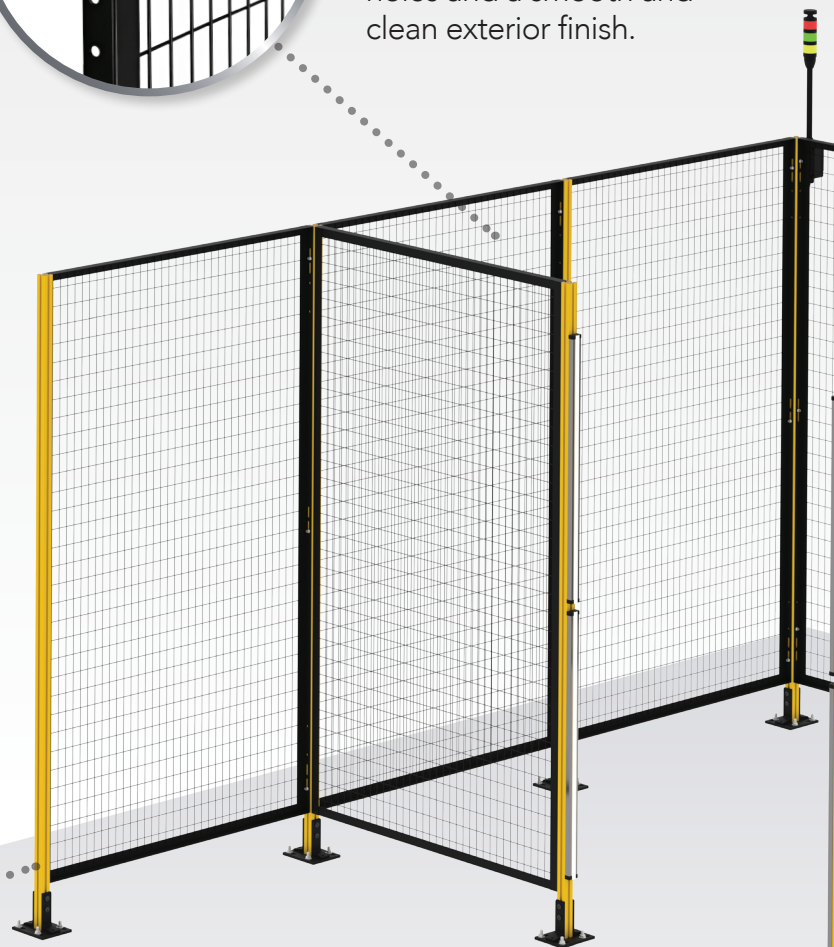

Yellow Powder Coat T-Slot Post

Heavy duty T-slot aluminum posts are yellow powder coated in a 1.50" x 1.50" dimension. Customize guarding by using other select 80/20 profiles.

Floor Mount

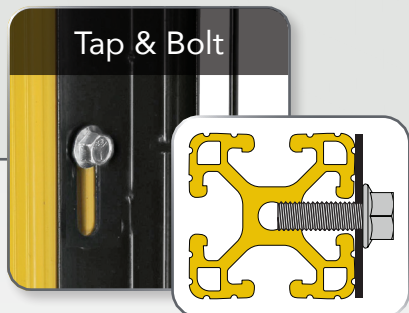

Each post includes an aluminum floor bracket to anchor to the ground for more stability.

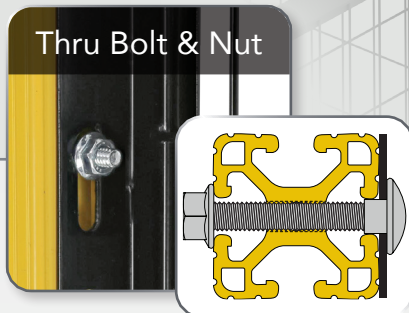

Multiple Ways to Connect

The versatility of 80/20's mesh guarding offers connection points to all four sides of a T-slot profile with fastening options based on your preference.

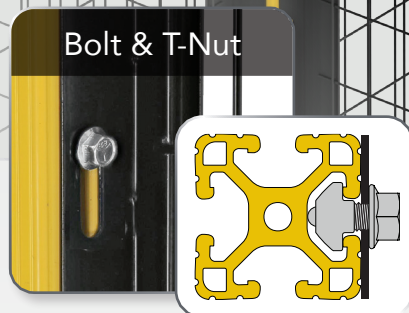

Tap & Bolt

Bolt & T-Nut

T-Slot Wire Mesh

Frame in 80/20's matching wire mesh to add a door for access. Components like handles, interlocks and hinges can be integrated easily.

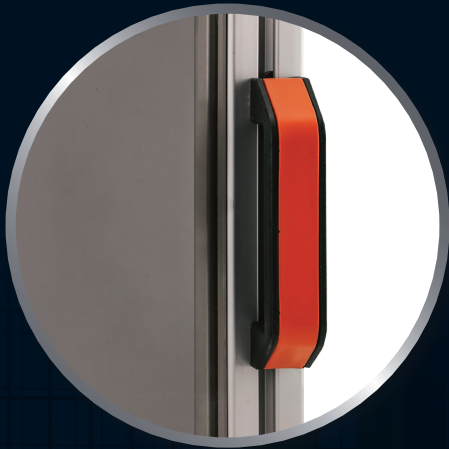

Linear Rail System

Add smooth motion with standard (pictured to right) or heavy-duty linear rail options. Mount directly to the T-slot or add an offset bracket for a tighter fit.

Other Accessories to Consider

Handles

Hinges

Latches
